Please comment on the strengths of this course and/or ways to improve this course.

Professor Loseu was a great teacher, he explained every topic very clearly

This is a standard calculus course with a terrible textbook

Everything was great

Get new book.

Great teaching style. Lectures are great.

A better textbook for this course would suffice, but other than that this course is good.

decent class, didnt learn much because i had taken a similar one in high school, but I didn't really get the new concepts introduced

The course covers all the necessary information for Calculus 1. It is in-depth and encompasses many useful techniques for solving problems.

It is very straight forward. There is not much you could do to improve it.

While I know the concepts very well, the applications (other than the set we were given) of the general principles still seems a bit vague to me which I think could be improved.

calc 1 is calc 1

Describe instructor's strengths, areas for improvement, and any additional comments.

Overall an excellent instructor.

Dr. George has a fantastic pace and also a very low key sense of humor which really made the class more enjoyable. He very clearly explains concepts and example problems and is the first to realize his own mathematical errors, which is refreshing. Would highly recommend.

Excellent professor all around -- extremely well prepared for class and excellent at communicating concepts

Awesome!!!

A great professor!

Professor Loseu is one of the best math teachers that I have had in my life.

Worst part is his accent, other than that he is the perfect professor.

His teaching style was very useful and he knows a lot of information. His accent is very understandable and easy to follow. I would definitely take another class with this professor.

Great enthusiasm for teaching and relatively clear when explaining topics.

Always made sure to provide ample office hours and made sure class was aware of any changes or conflicts. Provided plenty of practice material and examples to help prepare for quizzes and exams.

He is very enthusiastic and clearly understands the material very well. He takes questions a lot, which is good. However, he does not always answer the questions very clearly. But, overall an excellent professor.

One of the best professors I have had at Northeastern (as a sophomore). He enables students with the resources they need to succeed, does everything he can to help, always making himself available. A friendly person who knows his material extremely well, and effectively passes it onto us in an interesting way.

Really good teacher. He knows what he's doing. Comes to class with a plan and is very straight forward and ordered. He's funny at times too
