Q15 - Please comment on the strengths of this course and/or ways to improve this course.

Response Rate: 18.18% (4 of 22)

- I'm not terribly good at math, and I struggled during the whole course, but that wasn't because of the professor. Very challenging to me but the lectures and textbooks helped me a great deal.
- The course was less concept-oriented than I would have liked. Typically the algorithm for solution was explained but not concepts or logic behind the process.

- I think the course should be more tailored to a standard Calculus 2 curriculum. I took Calc AB in high school and this course contained much of the same information as AB. I did not learn very much new material.
- strengths were definitely blackboard content. also very neat and organized lecture style, this was always helpful

Q15 - Describe instructor's strengths, areas for improvement, and any additional comments.

Faculty: Loseu, Ivan

Response Rate: 54.55% (12 of 22)

- I am terrible at math but because of Professor Loseu I actually learned a lot. I also liked that he had multiple quizzes throughout the semester which helped me stay on top of my work and not get lost like I normally do in math classes.
- While I think that Ivan had good intentions I think that he assumed a lot of everyone in the class. The textbook and homework problems were very challenging and often didn't really line up with problems we had done in class. I think that he picked quiz questions that were rather tricky/always seemed to have a catch to them. Quiz averages were often low like 22/30 or so with no scale. Was very useful outside of class. Overall good intentions and wants kids to do well just needs to be a bit more realistic with the material he is presenting. Also needs to slow down in lecture and take the time to go through the steps. We often get answers but are not exactly sure where they came from.
- Awesome professor! He truly cared about his students and wanted them to succeed while still maintaining a rigorous curriculum.
- Professor Loseu is a very good professor. I missed a test earlier in this class because of a problem on my commute to class and he offered me a make up date. He responded to concerns in a very timely manner and has a good grasp on calculus and how to teach it well. Despite my having struggled through the entirety of the course, I would still recommend him to fellow students. I just wish math came more easily to me.
- Sometimes his explanations were really long winded, all around he explained things thoroughly but a more stripped down approach would have been easier for me to understand.
- Good man, you can tell he really enjoys teaching. Very helpful and very available outside of the classroom during office hours.
- The professor spent hours outside of class helping me to understand this difficult subject. He ALWAYS responded to e-mails very promptly and in depth. He is a very helpful teacher as well as very considerate. He wants all of the students to do well. Very smart and very willing to explain things multiple times in order to get the point across. Great teacher. Only complaint - we needed more time for the tests!
- Very helpful and prepared for class. Very organized!

- Great prof! Always gives question and answer time. Always explains very clearly and writes everything on the board. Gives excellent exam prep and is always available by email or office hours. Extremely easy to communicate with and a very effective teacher.
- he was very kind and understanding, always prepared and ready to teach, great guy overall, great teacher, please continue with the blackboard material -- VERY HELPFUL
 - One of the best teachers I've had so far
 - Very enthusiastic, wants the students to do well. The practice quizzes always make me feel prepared. His accent is strong and at first I struggled to understand but I soon got the hang of it. Overall great guy
